Profile

Electrical Engineer with 6 years of experience in electrical design and technical office engineering across commercial, governmental, and major entertainment projects in Egypt, Saudi Arabia, and the UAE.
Proficient in low and medium voltage electrical design, covering load scheduling, SLD and BOQ preparation.
Specialized in light current systems design, including fire alarm, data networks, CCTV, and sound systems.
Proven expertise in technical office delivery including shop drawings, details drawings and material submittal integration.
Adept in BIM methodology, with solid practical experience coordinating MEP works using Revit and Navisworks and developing automated workflows using Dynamo and C#.

Work Experience

BIM Electrical Technical Office Engineer
MTEC | Abu Dhabi, UAE | Jul 2025 – Present

- Produce shop drawings for electrical systems including power distribution, lighting, and Cable Containment.
- Coordinate with consultants and clients to obtain design approvals and resolve technical queries.
- Prepare technical submittals, load distribution schedules, and compliance reports.
- Provide ongoing support to site teams for design clarifications and drawing revisions.

BIM Electrical Technical Office Engineer
C&P | Cairo, Egypt | May 2025 – Jul 2025

- Prepared electrical shop drawings for lighting, Mechanical power, small power and light current systems.
- Assisted in preparing material submittals and coordinated with suppliers for approvals.
- Supported project BOQ preparation.

BIM Electrical Design Engineer
EGEC | Cairo, Egypt | Jul 2024 – May 2025

- Designed complete electrical systems for school projects under the Royal Commission for AlUla (RCU) using Revit and BIM standards.
- Delivered electrical design packages for Modon Projects, covering power, lighting, and LV distribution.
- Collaborated with mechanical and civil teams to identify and resolve model clashes in Navisworks.
- Prepared BOQs and construction documentation to support project delivery and contractor tendering.

BIM Electrical Technical Office Engineer
Albawani | Riyadh, KSA | May 2023 – Jul 2024

- Developed BIM models and construction drawings for the Madina Entertainment Complex.
- Coordinated with architects and contractors on King Salman Park and the Royal Commission for AlUla projects.
- Conducted quantity take-offs and maintained accurate project documentation throughout design stages.

BIM Electrical Technical Office Engineer
Solid Construction | Cairo, Egypt | Dec 2021 – May 2023

- Produced shop drawings for IL-Bosco (New Administrative Capital) and Odyssia City (Mostakbal City).
- Optimized electrical layouts for the district 5–Marakez development to minimize rework during construction.
- Coordinated with site teams to issue design revisions and respond to RFIs within project timelines.

Electrical Technical Office Engineer

Power Tech Co. For Earthing | Cairo, Egypt | Dec 2020 – Dec 2021

- Prepared tender documents and BOQs for earthing and lightning protection systems.
- Produced technical drawings and specifications for earthing installations.
- Supported site supervision activities and responded to technical queries during project execution.

Education

Bachelor of Electrical Engineering

South Valley University | Sept 2015 – Jul 2020

- Grade: Good
- Graduation Project: Power System Distribution and Light Current (Grade: Excellent)

Certifications

- **MEP BIM Diploma** – Kaitech Scholarship, 2021
  Covered: MEP BIM modeling (mechanical, electrical, and family creation), BIM coordination and clash detection, BIM management and ISO 19650 standards, Dynamo automation and 4D to 7D BIM simulations
- **Power System Distribution** – JELECOM, 2020
  Covered: Lighting design, power distribution, equipment sizing, system calculations, earthing and lightning systems, and low current systems
- **Mastering Revit API Course** – Elzohry Academy, 2023
  Covered: C# programming, Revit API foundations, Revit element manipulation, discipline-specific automation, advanced UI and architecture, and deployment.
- **PLC and Automation** – ATS, 2020

Technical Skills

Software: Revit, AutoCAD, Navisworks, ETAP, Dialux Evo, BIM 360 and ACC.
Soft Skills: Teamwork, Problem-Solving, Creativity, Adaptability and Attention to details.
